Comments/ suggestions on visits and the end appointment exam

9 responses

In Anti TB and Anti malaria campaign visit they did same lecture which was done during our modules.

Good appointment

Would be great if the paper and ospe can cover most of the visits (variety of questions) rather than focusing on just few visits

Regarding visits,

If a demo or any organiser could come with the students for those visits , it will be really great and efficient . During the visit to water treatment plant , they just provided us the location and a bus , but we didn't know we had to go to two places. If any organiser was there with us (at least for those far away visits) , that won't be happened. Overall, the appointment was good although we had to provide our own transport during first two weeks. We really liked some of the visits like IDH , sarvodaya , water treatment etc.

Regarding exam ,

It was good. Some seq questions were felt like repeating same things. But , it was okay.

just listening to lectures i couldn't understand the importance of those programme, after visiting i got the knowledge about the importance of those places, specially the sister in IDH conduct the session by telling "pandemic and arise in anytime" and how to combat such a instance, and i hadn't any idea about orphanage living children, those are also a part of our society me met. at Sarvodaya also the opened a another part of the health field we couldn't see through hospitalizes patients, and our national level organizations, how they do their optimum things without having sufficient resources. so thank you so much for all department and all helped resource person to giving this valuable opportunity.

It would be better if we were informed what to di at a visit. For an example at the water treatment day we weren't even aware that we had to visit another place.

Likes :

Through this appointment I could be able to visit and get to know about many institutions related to health and I am very happy for that.

In Sarvodaya visit, I got the chance to see the life in another perception specially about the spiritual well-being.

Dislikes:

Additional time consumption was the massive problem we faced in this programme. Lack of transport also added to the difficulty.

For the PHI visits like factory visit and food handling, everything was in Sinhala. It was bit

tough to catch up for me.

In sessions like AMC, we did the same thing taught in the lectures.

In overall,

for me this appointment is so worthy.

And specially I am accustoming myself to be punctual. Lesson learning in progress. 🙌

Overall, the clerkship program was good, and we learned a lot. I especially appreciate the visits to the PHM and IDH. We would like more opportunities to learn from these visits.

About Anti-Filariasis Campaign it was not effective.

On Antenatal Clinic Day We couldn't attend the antenatal clinic because the MO- MOH gave a long lecture lasting 2.5 hours. This made the session less effective. Please inform them to manage their time better in future sessions, as we missed the chance to attend the clinic. Additionally, the MO's attitude made it difficult for us to engage or ask questions.

About Raddolugama and Ragama Rehabilitation Visits, During these visits, we faced many difficulties due to the demonstrators' irresponsibility.

Transport issues led us to request the cancellation of one appointment. While it was challenging, you kindly considered our request, for which we are very grateful.

About the clerkship exam, Before the exam, I stayed up all night, worried that it would be very difficult. However, the exam focused on practical knowledge. On the OSPE, questions with documents were not clear, and I couldn't even read the Pap smear form question within the limited time. anyway after the exam, I slept the whole day peacefully.

We understand the challenges you face with limited lecturers, and we appreciate your efforts. However, we hope you can also consider our concerns.

Thank you Sriyani madam, on every appointment you attended you always tried teach new things and appreciated us as far as u can.

And also on case based discussion day we learnt a lot and it was fun ,Thank you very much Shamini madam.

Thank you very much. Overall, I enjoyed this clerkship and learned a lot.

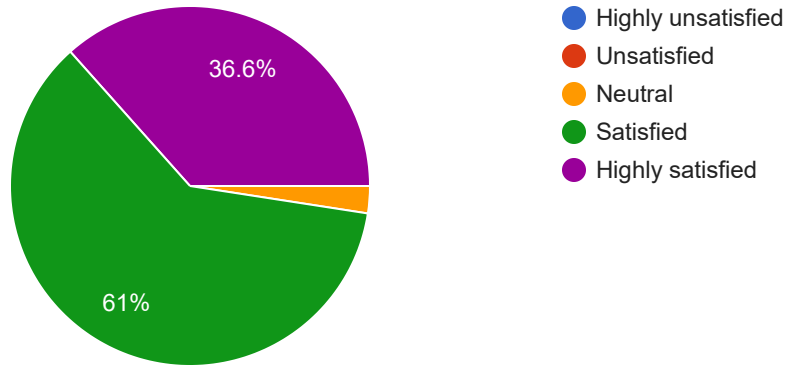

Very interesting appointment

Overall satisfaction

Response to Student Feedback –Clerkship Group I,J,K,L

Committee/Department – Community Medicine

Batch -30th Batch

Group- I,J,K,L

Year -2024

S/N	Student Comment/Suggestion	Decision (valid/Invalid /Need further Information)	Proposed Action	Responsible Person
	9 responses out of 41 total responses			
1	Anti filariasis campaign was not effective	Need further Information		Coordinator
2	Same lectures done in Infection module were repeated at anti-malarial campaign visits (2)	Valid	We do accept this as a duplication. But, we also do these reinforcing lectures as we are trying to keep Malaria from remerging in the country. We discussed with the resource persons of the anti-malaria campaign and they agreed to modify the teaching sessions.	HoD Coordinator
3	Unable to attend Antenatal clinic due to prolong lecture at MOH (1)	Need further Information		Coordinator
4	Unaware that both Raddolugama and Ragama rehabilitation visit have to done on same day (2) Better to accompany a demonstrator or organizer at least for far away visit for planning coordination of that visit. (Raddolugama visit) (1)	Valid	Senior social worker attached to the department is given the responsibility of accompanying the students when they visit far away places including these visits. That day, he has not accompanied the students and it was not informed to the HoD or the coordinator. HoD has called explanation and has advised him not to	Senior Social Worker

			repeat this kind of behaviour.	
6	Difficult to catch up all the PHI visits Since those are conducted in Sinhala.(1)	Invalid	PHIs are the resource persons of these visits and most of the teaching materials are uploaded in the Google classroom. Also, during the orientation programme Medical Officer of Health briefly describe the activities carried out by PHII in English medium. Further, students who cannot understand Sinhala can get the help of Sinhala group members.	
7	Unavailability of transportation lead to cancellation of one visit and made some visits much difficult (2)	Valid	Transport was not available due to Non- Academic staff Trade Union Actions	Senior Social Worker
8	Better to have questions covering most of visits instead of few visits in clerkship exam.(1)	Invalid	The questions are made as per the blueprint. All visits cannot be covered for all groups. As per the blueprint, the questions are made at the beginning of the year, and randomly allocated for the examination of 4 clinical groups. But there are must to know visits which are asked from all groups, such as Antenatal care, child care etc	
9	Some of OSPE questions are not clear since those were unable to read within limited period. (1)	Invalid	Students were supposed to identify the documents projected and answer the questions. Reading all contents were not required to	

			answer those questions. Those who were visually challenged were asked to sit in the front rows.	
10	Through the Visit to Sarvodya ,able to gain perception about spiritual well being (3)	Valid	We will continue to send students to these places	HoD/Coordinator
11	IDH visits was good (3)	Valid		
12	PHM visits was good (1)	Valid		
13	Water treatment plant visits was good (1)	Valid		
14	Overall appointment was good (6)	Valid	Thank you	
15	Grateful to Sriyani madam for teaching new thing in convenient manner to students at every visits and case based discussion.(1)	Valid	Thank you	
16	Grateful to the Shamini madam for the everything teach us.(1)	Valid	Thank you
