

Response to student feedback – Clerkship Programme evaluation

Committee/ Department :-Community Medicine

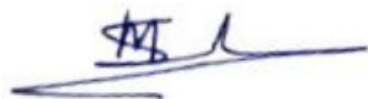

Batch:-29th Group DEF

Year:-2023

S/N	Student comment/suggestion	Decision (valid/ invalid/ need further information)	Proposed actions	Responsible Person
1	Couldn't visit the record room Csth. (3)	Valid	The medical Officer who usually does the class for students got transferred. Need to speak to the new MO.	Coordinator of the Clerkship programme
2	The Dehiwela MOH had cancelled the clinic due to the children's day which was so unfortunate. They didn't inform us till the last minute	Valid	Mr Upali is given the responsibility to call the relevant place the day before to confirm the visit.	Mr Upali
3	At most places we did not have enough time to visit all the facilities they have...eg: Ragama rehab hospital, Central chest clinic (2)	Need further information	Need to see whether they can achieve the learning objectives without seeing all the facilities. If not they can get information about the facilities available through the relevant resource persons or if they can be divided into smaller groups and visit the facilities available and then share among the whole group about their experience they can overcome this issue	Coordinator of the Clerkship programme
4	In our visits to AMC and AFC I found that they were unaware of what objectives to be fulfilled. AMC, AFC, ARC explained their administrative structures, but did not fulfill most objectives given. (3)	Invalid	The letters containing objectives were posted well in advance to all places. In addition, objectives are attached to the attendance files for the resource persons to go through. We will discuss this with the relevant units. However, students are given the learning objectives for each session at	Coordinator of the Clerkship programme

			the first day of the Clerkship programme. If the resource person fail to cover the objectives due to some reason, students should ask relevant questions from the resource person and should get their objectives covered.	
5	At the WWC Godigamuwa there were only few people for screening so we could not see how the people are advised regarding family planning, health education & so on. (2)	Valid	Will ensure that students will be sent to places where adequate exposure is available	Coordinator of the Clerkship programme
6	For food inspection, it's better to go as 2 separate groups because most of us could not hear & see what PHI taught us when it's crowded. (2)	Valid	Food inspection is normally sent on the same date for both groups. We might have to send on two days or two places since the group will be larger next year	Coordinator of the Clerkship programme
7	Anti filarial campaign lecture was very poorly conducted. He did not touch on the campaign at all during his allocated time. (2)	Need more clarification	Objectives of each visit is given to both resource person and the students. If the resource person fail to cover the objectives due to some reason, students should ask relevant questions from the resource person and should get their objectives covered. We will discuss this with the Director AFC	Coordinator of the Clerkship programme
8	Epidemiology unit lecture was very long and boring...she failed to teach us about the central cold chain facilities and such as she ran out of time. (1)	Valid	We will discuss this matter with the Epid unit	Coordinator of the Clerkship programme
9	CBL was very helpful and interesting but if would've been more effective if done after the clinic visits and PHM home visits. (3)	Valid	Thank you for the comment. We will try to make the necessary changes to the next Clerkship programme	Coordinator of the Clerkship programme

10	A special thanks extends to Shiyam sir, all the PHIs who taught us and Sampatha madam, Shamini madam, Maheeka madam for all the efforts to make this appointment as successful as possible for us. (1)	Valid	Thank you	-
13	The visit to Sarvodaya was really inspiring, it gave us a new perspective on things. Some of us got inspired to engage in voluntary work ourselves one day. (4)	Valid	We will continue sending students to Sarvodaya	-
14	Appointment was an enjoyable one, learnt a lot. (9)	Valid	Thank you	-
15	All visits were well organized. (3)	Valid	Thank you	-
16	RRC, factory visit, food inspection, water treatment, IDH, AMC, ARC, AFC, cancer control, SMI and HLC visits were highly satisfactory. (1)	Valid	Thank you	-
